ABRASIVES

Advanced Sanding Technology
With Swiss Precision

with **CRT™** clog resistant technology

ADVANTAGES

- ▶ suitable for a wide range of applications
- ▶ for stationary belt machines
- ▶ easy use and removal
- ▶ low clogging

APPLICATIONS

- ▶ sanding of varnish, paint, lacquer and filler
- ▶ sanding of solid wood and veneer
- ▶ coarse grits for stock removal
- ▶ sanding on flat surfaces

WEBB ABRASIVES: TOOLS & BELTS

► BELTS

MODEL	TYPE	GRAIN	BOND	USES	GRIT
1919	Paper	Aluminum Oxide	Resin over Resin Antistatic Stearate 0 Tolerance	Stationary belt machine on wood/lacquer. Heavy F-weight paper in course grits for stock removal. D-weight paper in fine grits for finish on sealer/lacquer	P36-P800
1749	Paper	Silicon Carbide	Resin over Resin Antistatic 0 Tolerance	Stationary belt machine on composite materials (filler, lacquer, wood, metal). Heavy F-weight paper for long life.	P60-P400

Narrow and wide belts available. Inquire for sizes and pricing.

► BLOCK

DRY BLOCK

Utilizing quick change hook n' loop backed abrasives, this dual foam block possesses twice the versatility with hard foam on one side with a density comparable roughly to an old-fashioned felt rubber and soft foam on the other side for sanding gently curving surfaces. Both types are excellent and useful additions to the job of hand sanding and quite economical as the abrasive can be peeled off and re-used at a later date.

CORK BLOCK

Utilizing quick change hook n' loop backed abrasives, this traditional cork block gives just the right amount of resilience when sanding. Light and comfortable for prolonged use.

MODEL	COUNT
DRY BLOCK	1
