Advanced Sanding Technology

Webb Manufacturing has been providing quality products since 1874. Webb Abrasives, a division of Webb Manufacturing, has consistently provided advanced sanding technology to the abrasive industry.

We entered the abrasives market by delivering the first true no-load sanding sponges to the coating industry. In addition to our exceptional BLUE foam sanding sponges with CRT™ (Clog Resistant Technology), Webb continues to build relationships with a full line of quality abrasives and outstanding service.

From sanding sponges to sanding discs, to non-wovens and sandpaper, Webb Abrasive will be your partner in providing the best technology for your next project.

advanced sanding technology

[Quick Set Sanding System]

The Quick Set Sanding System consists of CRT™ (Clog Resistant Technology) discs and a reusable hook & loop foam back-up pad for dustless sanding and quick changing of discs.

The new bonding system of Heat Treated Aluminum Oxide grit along with advanced CRT™ (Clog Resistant Technology) properties improve cut, flexibility and performance beyond traditional sanding discs.

[Specifications]

Size...	9" diameter
Backing...	hook n' loop backing attached to foam back-up pad.
Grit...	Heat Treated Aluminum Oxide with special CRT™ properties.
Grit Range...	P80-P280
Packaging...	Starter Pack: 5 discs + 1 interface pad per pack Pro Pack: 25 discs per box

Interface Donut back up pads are compatible with the Porter Cable 7800 Drywall Sander. Easily change your pad with a twist.

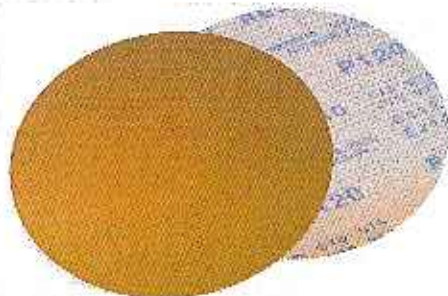

[Essential Accessories]

Webb Abrasives Double Slant Block: 3" x 5" x 1"
With dual angles and durable grit on all 4 sides, this CRT sanding sponge is the perfect tool for corners and light areas not reachable by machine. Can be used wet or dry. Available in fine, medium and medium/fine grit.

Premium sanding discs feature provide superior performance when used in conjunction with the Porter Cable 7800 Dustless Sander and the Interface Donut.

[CRT™ Drywall Pole Sheets]

The CRT™ Drywall Pole Sheets feature tear resistant paper infused with Heat Treated Aluminum Oxide and unique stearates to create one of the most pliable and effective sanding sheets on the market.

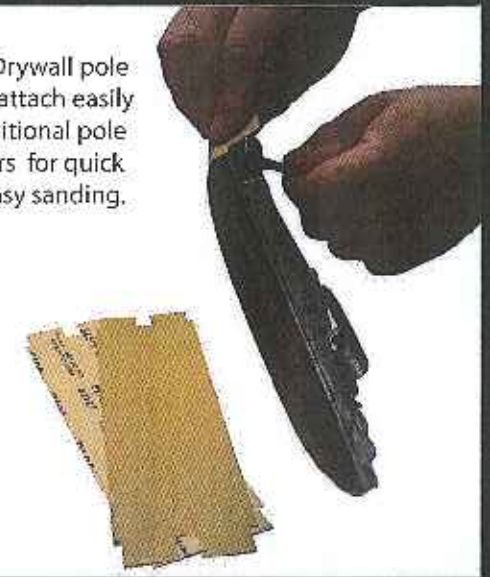

CRT™ pole sheets will yield professional sanding results every time with advanced clog resistant properties for maximum cut rate and life of the product.

[Specifications]

Sizes...	3-5/16" x 11-3/4" 4-3/16" x 11-3/4"
Grit...	Heat Treated Aluminum Oxide with special CRT™ properties.
Grit Range...	P80-P280
Packaging...	Pro Pack: 100 sheets per box

CRT™ Drywall pole sheets attach easily to traditional pole sanders for quick and easy sanding.

CRT™ Drywall pole sheets have a universal die cut and come in 2 widths to fit most drywall pole sanders.

[Essential Accessories]

Webb Abrasives Standard Block: 2-5/8" x 3-7/8" x 1"
This universally applicable CRT sanding sponge is perfect for small touch-ups and profile sanding. Durable grit on all 4-sides. Can be used wet or dry. Available in fine, medium and medium/fine grit.
